

PROFILE

Full-Stack **Dart & Flutter Developer** with **4 years of experience** delivering production-grade cross-platform applications for **iOS, Android, Web, and Desktop** in industries including **machinery, wellness, and agribusiness**.

Specialized in **Flutter architecture, scalable state management, and real-time integrations** using **REST APIs and WebSockets**. Experienced in **CI/CD pipelines (Azure DevOps), automated testing, code reviews, and performance optimization**, ensuring reliable and high-performing releases.

Proficient in building backend services with **Dart (dart_frog)** and integrating modern cloud and database solutions. Skilled in implementing **AI-powered features** using **LLM APIs, RAG pipelines, embeddings, and prompt engineering** to enable contextual search, intelligent recommendations, and decision-support capabilities.

Previously worked for 3 years as **freelance backend developer** specializing in **PHP and JavaScript**, building and maintaining web applications using frameworks such as **Yii2, Symfony, and Pimcore**, as well as CMS platforms including **WordPress and Wix**. Development environments included **Docker and Vagrant**.

ACCOMPLISHMENTS

- Successfully delivered cross-platform Flutter applications for iOS, Android, Web, and Desktop, ensuring stability, performance, and consistent user experience.
- Implemented the full development lifecycle — architecture design, API integration, UI implementation, testing, optimization, and production releases.
- Integrated AI-powered features and third-party services, enhancing product value and user engagement.
- Designed and maintained scalable architecture, enabling easier feature expansion and smoother team collaboration.
- Worked effectively as a Full-Stack engineer, combining Flutter development with backend logic, data handling, and service integration.
- Improved overall code quality through clean architecture, refactoring, and modern state-management practices.
- Integrating various third party custom databases.
- Contributed to a productive and collaborative team environment, supporting rapid development and continuous product improvement.
- Onboarding new-commers and introducing to corporative requirements and development flow, providing manuals.

PROFESSIONAL EXPERIENCE

Air traffic controller, Uksatse **Sept 2013 to Feb 2022**

- Former en-route **Air Traffic Controller**, responsible for coordinating aircraft movements, ensuring flight safety, and managing airspace operations.

Wordpress developer, Freelance **Jun 2016 to Feb 2022**

- Developed and maintained a corporate WordPress website and blog, provided technical support and content management, managed private statistics and user accounts for up to 250 users, and led the redesign of the site's UI/UX.

Pimcore CMS developer, Farmspace Ltd **Feb 2021 to Feb 2022**

- Developed a Pimcore-based CMS solution for managing products and services maintenance, including integration with a corporate website and auction platform.

Flutter cross-platform full-stack developer, Global Food and Agribusiness Network **May 2022 to Present**

- Developed and maintained cross-platform mobile applications using **Flutter**, implementing scalable architectures, integrating APIs and backend services, and ensuring high performance and reliable releases through CI/CD and testing for multiple clients and businesses.

EDUCATION

National Aviation University **Sept 2007 to Jun 2012**
Master Degree

IT Step Academy **Sept 2014 to Sept 2016**
Courses

Full Stack development courses (HTML, CSS, JS, PHP, Apache, MySql, Drupal)

HOBBIES

Certified Yoga Teacher conducting both offline and online classes, while also studying and teaching English language.

LANGUAGES

English C1. ICAO Certificate , Ukranian, Russian
